The diagram is drawn on a piece of lined paper. On the left side, there is a hand-drawn grid consisting of 4 vertical lines and 6 horizontal lines, creating a 3x5 array of squares. To the right of the grid, two straight lines are drawn that intersect at a single point. The intersection point is located at the third vertical line from the left edge of the grid and the second horizontal line from the bottom edge of the grid. Both lines have arrows at their right ends, indicating they extend infinitely. The line with a positive slope passes through the points (0, 0), (3, 2), and (6, 4). The line with a negative slope passes through the points (0, 6), (3, 2), and (6, 0).
